

- **Skin supplements** - pet skin supplements often contain ingredients such as fish oil that can help improve dry, flaky skin.
- **Creams and lotions** - if your cat has a small area of dry skin, for example on their nose or an elbow, you could try using a small amount of a pet safe moisturiser (for example Vaseline) to keep the area moist and prevent it cracking. Speak to your vet if you aren't sure which product to use.
