

PDSA ANIMAL WELLBEING REPORT 2018

The essential insight into the wellbeing of UK pets

Methodology

This summary provides an overview of key findings for pets in the East of England from our 2018 PDSA Animal Wellbeing (PAW) Report.

We surveyed a demographically representative sample of 4,639 UK pet owners in partnership with YouGov for the main Report, and we present here the results for the subset of these owners living in the East of England.

Our total sample size was 536 dog, cat, and rabbit owners; aged 18 or over; and living in the East of England. Fieldwork was undertaken between 9th and 19th January 2018. The survey was conducted online and statistically analysed by YouGov. Percentages were rounded to the nearest whole number. A minimum sample size of 50 was set to ensure robust results.

UK figures are taken from the main PAW Report and full methods are detailed therein. They have only been given for comparison where regional results are **statistically significantly different** from them. These have been highlighted in bold for clarity.

In the East of England we surveyed...

215 dog owners

211 cat owners

110 rabbit owners

You can download the full PAW Report from our website **pdsa.org.uk/pawreport**

100 years

As the UK's leading veterinary charity, PDSA is committed to identifying and addressing barriers to pet wellbeing. After 100 years of working every single day to improve the lives of our nation's pets, we can reflect on how far we have come, and how far we still have to go.

The findings of our PAW Report continue to provide a valuable insight into the wellbeing of our nation's pets. We're incredibly proud that over the last eight years these findings have helped form the basis of campaigns and collaborative initiatives across the animal welfare sector and veterinary profession, to help improve pet wellbeing and give our nation's pets the great lives they deserve.

Population

These estimates are calculated using a combination of data collected for the PAW Report, a nationally representative survey of UK adults, and official government statistics. 53% of adults in the East of England own a pet

31%

of adults in the East

of England own a cat

(1.4 million cats)

When calculating population figures in the rest of this Report we've taken the population figure here, multiplied it by the percentage, then rounded to two significant figures.

of adults in the East of England own a rabbit (Total number of rabbits could not be estimated due to sample distribution)

of adults in in the East of England own a dog (800,000 dogs)

73%

The 5 Welfare Needs

This report is structured around owners' knowledge and application of the Animal Welfare Act and the 5 Welfare Needs that are enshrined within them.

In the East of England ...

41% of owners state they are familiar with the Animal Welfare Act 2006

25% of owners feel very informed with all 5 Welfare Needs

but only

16% of owners are able to correctly identify all 5 Welfare Needs

Similar to UK figures, East of England owners feeling very informed of the 5 Welfare Needs did not translate to the ability to correctly identify them from a list and few were familiar with the relevant Animal Welfare Act.

Pre-purchase

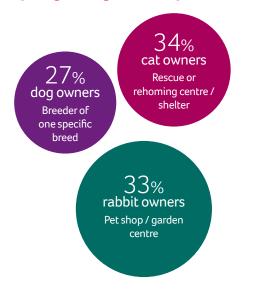

Despite pre-purchase research being a vital part of responsible pet ownership, 26% of pet owners in the East of England did none at all before choosing a pet.

In the East of England ...

Only 39% of pet owners visited their pet on more than one occasion before taking them home

13% of pet owners would consider buying from a puppy farm

Top places owners in the East of England got their pet ...

Costs of pet ownership

95% of cat owners in the East of England underestimated the minimum lifetime cost of cat ownership

93% of rabbit owners in the East of England underestimated the minimum lifetime cost of rabbit ownership

For details of how we calculated the costs of ownership and what owners were asked to include in this estimate, please refer to the full Report available online at **pdsa.org.uk/pawreport**

in summary ...

East of England owners display shortcomings in pre-purchase research and consistently underestimate the cost of pet ownership, reflecting the same problems as the rest of the UK.

\land Environment

Results for the East of England are similar to UK averages, with many owners who walk their dogs expressing concerns about it

- 96,000 dogs (12%) are walked less than once a day
- 51% of owners have one or more concerns about walking their dog

Diet

Results for the East of England are similar to UK averages, with dog obesity remaining a key problem

- 14% of dog owners matched the shape of their pet to an overweight or obese silhouette (body condition score (BCS) 4/5 or 5/5)
- 37% of owners did not know the weight or BCS of their dog

😵 Behaviour

Results for the East of England are similar to UK averages, with a high proportion of dogs showing fearful or troublesome behaviours

- 13% of dog owners (104,000 dogs) haven't trained their dog in any way
- 78% of dog owners (620,000 dogs) report that they would like to change at least one of their dog's behaviours
- 650,000 dogs (81%) are reported to be afraid of something (e.g. fireworks, thunder and lightning)
- 360,000 dogs (45%) are afraid of fireworks

Companionship

Results for the East of England are similar to UK averages, with a high proportion of dogs being left alone for longer than acceptable

- 180,000 dogs (23%) are left alone for 5 or more hours on a typical weekday
- 8% of owners report that they'd like to change their dog showing signs of distress when left alone

😽 Health

Results for the East of England are similar to UK averages, with many still missing out on vital preventive care

- 12% of dogs (96,000 dogs) aren't registered with a vet
- 43% of dogs (340,000 dogs) aren't insured
- 60,000 of dogs (8%) aren't microchipped
- 20% of dogs (160,000 dogs) aren't vaccinated with a primary course when young

in summary ...

Dog owners in the East of England echo national shortfalls regarding their pets' Welfare Needs, and addressing the issues raised in the main Report would improve their health and wellbeing.

Cats

Rabbits

Environment

Results for the East of England are similar to the UK average, with lack of resources a major problem

 In homes with multiple cats, owners aren't providing enough scratching posts or water bowls for their cats (recommended minimum is number of cats + 1)

😑 Diet

Results for the East of England are similar to UK averages, with lack of awareness of body shape reflecting a problem with feline obesity

- 55% of cat owners matched the shape of their pet to an overweight or obese silhouette (body condition score (BCS) 4/5 or 5/5)
- 61% of owners don't know the weight or BCS of their cat

😵 Behaviour

Results in the East of England are similar to UK averages, with increased complaints of hunting wildlife possibly reflecting a larger rural population

- 79% of cat owners (1.1 million cats) report that they would like to change at least one of their cat's behaviours
- Top three behaviours that owners wanted to change were scratching furniture, scratching carpets, bringing wildlife into the house
- 1.2 million cats (89%) were reported to be afraid of something. The top three fears were unfamiliar people, vacuum cleaner and fireworks.

Companionship

Results for the East of England are similar to UK averages, revealing poor owner understanding of cats' solitary natures

- 590,000 cats (42%) live in a multi-cat household
- 16% of cats live with another cat or cats that they don't get on with

👽 Health

Results for the East of England are similar to UK averages, with several shortfalls in preventive health provisions

- 14% of cats (200,000 cats) aren't registered with a vet
- 8% of cats (110,000 cats) aren't neutered
- 28% of cats (390,000 cats) aren't microchipped
- 31% of cats (430,000 cats) aren't vaccinated with a primary course when young

in summary ...

Apart from the issues identified for the whole UK, no region-specific concerns emerge for cats in the East of England. However, there is still much work to be done in line with the recommendations in the full Report to ensure their Welfare Needs are met.

The second secon

Results in the East of England are similar to UK averages, with many rabbits facing life in small, barren hutches

25% of rabbits are kept in inadequate housing

😑 Diet

Results in the East of England are similar to UK averages, where despite some improvement many rabbits are still fed inappropriate diets

- 25% of rabbits are fed rabbit muesli as part of their main diet
- Only 53% of rabbit owners feed the daily recommended amount of hay
- 75% of rabbit owners don't know the weight or body condition score of their rabbit

😵 Behaviour

Results in the East of England are similar to UK averages, with many natural behaviours being misunderstood as problems

- 55% of rabbit owners want to change at least one of their rabbit's behaviours
- Top three behaviours owners wanted to change were digging up ground and / or carpets, chewing furniture etc, and biting the bars of the run / hutch repeatedly
- 61% of rabbits are reported to be afraid of something (e.g. loud noises, fireworks, unfamiliar people)

Companionship

Results in the East of England are similar to UK averages; despite being highly social many rabbits are kept on their own

• 48% of rabbits live alone

😽 Health

Results in the East of England are similar to UK averages with the preventive health of many rabbits being neglected

- 29% of rabbits aren't currently registered with a vet
- 50% of rabbits aren't neutered
- 49% of rabbits aren't vaccinated with a primary course when young

in summary ...

Serious issues, similar to those highlighted for the whole of the UK, are facing pet rabbits in the East of England, owner education across all 5 Welfare Needs must be addressed in order to improve their wellbeing.

Help us improve pet wellbeing

Every year the PAW Report gives us essential insights into pet wellbeing in the UK and this year we have released results for the UK's constituent nations and England's regions to help tailor local strategies.

We'd love for the findings of this year's Report to again be used by the sector to continue to stimulate change – to enable us all to acknowledge the most pressing issues and tackle them head on. This will ensure continued momentum in the drive to improve the welfare of pets in East of England and across the UK.

Only through hard work and collaboration can we tackle these issues in order to see improvements in key areas such as obesity, loneliness, behavioural issues, pre-purchase decision making and more in future PAW Reports.

Saving pets is what we do. Every. Single. Day.

Your support today will save pets' lives tomorrow.
