

Cost

Managing an osteosarcoma is often very expensive, especially if you opt for surgery and chemotherapy. It's very important to speak openly to your vet about your finances, the cost of treatment, as well as what you think is right for your dog. There is often more than one treatment option, so if one doesn't work for you and your pet, your vet may be able to offer another.

Consider insuring your dog as soon as you get them, before any signs of illness start. This will ensure you have all the support you need to care for them.
