

Owning a one-eyed cat / blind cat

One-eyed cats. Owning a one-eyed cat isn't particularly different to owning a fully sighted cat, they tend to adapt very well. Below are some tips to help them:

- Talk to them when you approach them on their blind side to avoid startling them. Mention this to visitors and take extra care with other animals and small children.
- Move any head height objects that could damage your cat.

Blind cat. Caring for a blind pet is a big responsibility, but is possible if they adapt. Read our full article on caring for a blind pet.

Cost

An enucleation operation can be very expensive, especially if there are any complications. It's important to speak to your vet openly about your finances, the cost of treatment, as well as what you think is right for your cat. Consider insuring your cat as soon as you get them, before any signs of illness start. This will ensure you have all the support you need to care for them.
